## Application

For best results, Crystal Faerie should be applied by a professional nail technician. Crystal Faerie was designed for external use on finger or toe nails, and should be applied on top of nail polish, gel or professional glue. Do not use with other types and/or conventional glue. Exposure to UV rays will not affect Crystal Faerie's shine or durability.

1. Apply first coat of nail polish or gel and allow to dry completely.

2. One nail at a time, apply second coat of nail polish, gel or professional glue. Hold that finger over a small tray and sprinkle Crystal Faerie over the painted, still-wet nail.

3. Gently press and compact the crystals onto the nail and let it dry completely. We recommend using a cosmetic or nail brush to shape the crystals into the desired formation.

4. Apply a light, top coat around the edges of the crystals for maximum durability.

5. Pour remaining Crystal Faerie from the small tray back into the bottle for future applications.

## Removal

To remove Crystal Faerie, use nail polish remover or recommended remover for gel nail lacquer.
